

Borehole ID: 5433
Total Depth (m): 281.33
Drill type: Diamond

Longitude: 145.44

Latitude: -41.88

Figure 10 displays four depth-based plots (0 to 280 m) showing the SWIR Spectral Contrib., SNR, TIR Spectral Contrib., and SNR. The plots show varying levels of spectral contribution and signal-to-noise ratio across different depths, with color-coded bars representing different spectral components and black lines representing SNR.

Signal to Noise Ratio (SNR):
